ALUTRONIC
SOLUTIONS FOR COOL RESULTS
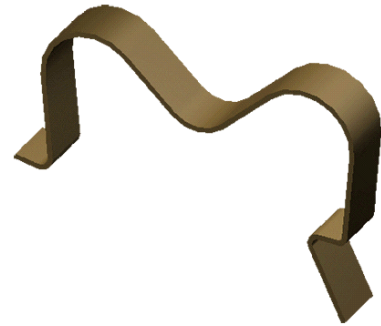

Product Data Sheet Type: MC900

Group: ACCESSORIES Mounting Material

Mounting clips

Device mounted by :   Clip Mounting

Material :   Spring Steel

Mounting clips facilitate the safe and efficient mounting of semiconductors to heatsink with the corresponding clip groove see page 32-34 - Spezial Heatsinks or page 39-41 - Standard Extruded Hartsinks.
Especially for insulated mounting, a clip provides reliability by making screws and insulation bushes dispensable.
Central contact pressure distributes the heat conductivity equally across the semiconductor/hestsink contact surface.
- Material: Spring steel (C75)
- Surface: bluing
- Width: 9,1 mm
